Megan Bedell

mbedell@flatironinstitute.org | +1 518 488 9348 | 162 5th Avenue, New York, NY 10010
0000-0001-9907-7742 | megbedell | https://bedell.space

Major Research Interests: precision measurement techniques for detecting Earth-like planets; stellar astrophysics; statistical and computational methods for time-series data

Positions Held

2024 – present | **Research Scientist**, Center for Computational Astrophysics, Flatiron Institute

2019 – 2024 | **Associate Research Scientist**, Center for Computational Astrophysics, Flatiron Institute

2017 – 2019 | **Flatiron Research Fellow**, Center for Computational Astrophysics, Flatiron Institute

Education

2012 – 2017 | **University of Chicago**
Ph.D. in Astronomy & Astrophysics
Dissertation Title: Illuminating the Origins of Planets with Solar Twins
Advisor: Jacob L. Bean

2008 – 2012 | **Haverford College**
B.S. with Honors in Physics and with Highest Honors in Astronomy

Honors & Awards

- Outstanding Paper Award, International Astrostatistics Association *(2020)*
- Josephine DeKarman Fellow *(2016–2017)*
- Lewis & Clark Field Scholar in Astrobiology *(2016–2017)*
- Illinois Space Grant Fellow *(2016–2017)*
- University of Chicago Harper Dissertation Fellow *(2016–2017)*
- NSF Graduate Research Fellow *(2013–2016)*
- Phi Beta Kappa *(2012)*

Mentorship & Teaching

- Extensive experience mentoring postdoctoral fellows, graduate students, and undergraduate students (see **Current & Former Mentees**)
- External examiner on thesis committees at Columbia, NYU, Yale, SUNY Stony Brook, University of Delaware
- Mentor for Cientifico Latino GSMI, 2024
- Instructor for the *LSST Data Science Fellowship Program* Session 10, 2019
- Guest lecturer for graduate classes at Columbia University, CUNY Graduate Center, and Universidade de São Paulo

Leadership & Service

- Terra Hunting Experiment, 2021–present
  - Scientific Operations Manager (designated), responsible for planning and oversight of survey operations for a 10-year radial velocity campaign targeting nearby Sun-like stars
  - Co-lead, Target Selection subgroup
  - Leader, Data Reduction Working Group, 2021–2024, coordinating cross-institutional planning for the HARPS3 spectroscopic data reduction pipeline

  - Member, Science Team
- Scientific Leadership, Center for Computational Astrophysics, 2019–present
  - One of the senior scientists anchoring the Exoplanets and Astronomical Data research groups; responsibilities include shaping group research directions, mentoring postdoctoral fellows, and fostering cross-group collaboration
  - Co-leader, Astronomical Data Group weekly meeting, 2019–present
  - Co-founder, Exoplanets weekly meeting, 2024–present
  - Active contributor to CCA postdoctoral and pre-doctoral hiring, including formal committee membership (Flatiron Research Fellow Hiring Committee, 2022–2024; Pre-Doctoral Scholar Hiring Committee, 2022–2023 & 2025–2026) and regular participation in annual application review and candidate evaluation processes
  - Member of committees shaping CCA institutional strategy, including the Director Search Committee (2020) and the Hiring Process Committee (2020–2023)
  - Member, Flatiron Institute Committee for Diversity, Equity, and Inclusion, 2020–2023
  - Organizer, CCA Colloquium, 2021–2024
- Member, Keck Planet Finder Science Team, 2020–present
- Science Organizing Committee member for **14** conferences/workshops to date, including:
  - *Sun-as-a-Star Workshop* (2023, NYC; SOC chair)
  - Three conferences in the *EPRV* series
  - Two conferences in the *HoRSE* series
  - *Telluric Line Hack Week* (2019, NYC)
- Time Allocation Committee or Panel member for **4** NASA cycles to date, including serving as Panel Chair
- Grant reviewer for NASA, NSF, and others
- Active referee for AAS, MNRAS, A&A, Nature journals

Contributions to Open Science

- Creator of the *gaia-kepler.fun* crossmatch database, used in >50 peer-reviewed publications to date
- Co-creator (with Annelies Mortier) of the gr8stars database, a public-access repository of high-resolution spectra for a *Gaia*-selected sample of bright Northern-hemisphere FGK stars
- Developer of the `wobble` open-source code in python + TensorFlow
- Contributor to astronomical open-source software including `eleanor`, `lightkurve`

Outreach & Press

- Speaker at Brooklyn Public Library's Night at the Library event (8500 attendees), 2026
- Featured panelist, SF Presents: Imagining Other Worlds, October 2024
- Interviewed for NPR All Things Considered, Nature, PBS News Hour, Scientific American.
- Featured profile for the Flatiron Scientist Spotlight.
- **3** first-author papers covered by press including Science News article, ESO press release [picked up by Associated Press]
- Creator of TESS Roulette interactive data viewer (`https://tess.casino`); 43000 pageviews
- Volunteer for solar viewing events with SF *Path to Totality* eclipse program in NYC and Austin, 2024
- Local organizer for NYC Dept of Education STEM Career Day, 2018
- Astronomy on Tap presenter in NYC & Chicago, co-founder of Chicago AoT branch, 2016–2018
- Presenter, Chicago Life Long Learning, 2015–2017
- Presenter, Adler Planetarium Space Visualization Lab, 2014–2017

Current & Former Mentees

- **Independent postdoctoral fellows** managed through the Flatiron Research Fellowship (FRF) program, including:
  - Daniel Yahalomi — 2025, now a Torres Fellow at MIT
  - Michael Palumbo — 2024–present

  - Ryan Rubenzahl — 2024–present
  - Jiayin Dong — 2022–2025, now faculty at UIUC
  - Lionel Garcia — 2023–2025
  - Lily L. Zhao — 2021–2024, now a Sagan Fellow at UChicago
  - … & informal advising of numerous additional Flatiron Research Fellows across the Exoplanets and Astronomical Data groups.
- **Graduate students** supervised (primarily) through the CCA Visiting Pre-Doctoral Scholar program:
  - Niamh O'Sullivan (Oxford) — 2026
  - Katlyn Hobbs (Queens University Belfast) — 2025–2026
  - Caprice Phillips (The Ohio State University) — 2024, resulting in 1 publication
  - Isabel Angelo (UCLA) — 2023–2025, resulting in 2 publications
  - Arjun Savel (UMD College Park) — 2022–2023, resulting in 2 publications
  - Chris Lam (University of Florida) — 2022–2023, resulting in 1 publication
  - Quang Tran (UT Austin) — 2021–2022, resulting in 1 publication
  - Arvind Gupta (Penn State) — 2021–2022, resulting in 1 publication
  - Lily L. Zhao (Yale University) — 2019–2020, resulting in 1 publication
- **Masters students** supervised through the CUNY Masters in Astrophysics program:
  - Lyniya Edwards (CUNY) — 2025–present
- **Undergraduates** supervised through summer programs including the Simons–NSBP Scholars Program, CUNY AstroCOM, and the Barnard Summer Research Institute:
  - Nusrat Jahan (CUNY Hunter College) — 2022
  - Lianys Feliciano (CUNY Hunter College) — 2022
  - Joann Roberts (Chicago State University) — 2020, resulting in senior thesis
  - Ilana Doran (Barnard College) — 2019–2021
  - Angus Beane (University of Pennsylvania) — 2018, resulting in 1 publication

Selected Talks

- MIT Astrophysics Colloquium, March 2026
- BU Astrophysics Seminar, March 2026
- McMaster University Physics & Astronomy Colloquium, March 2026
- CITA Seminar, March 2026
- University of Pennsylvania Astronomy Colloquium, February 2026
- Yale University Astronomy Colloquium, February 2026
- Five Colleges Astronomy Department Colloquium, March 2025
- Know Thy Star, Know Thy Planet 2 (invited talk), February 2025 **[slides / watch online]**
- SONG 2024 Science Meeting (invited talk), September 2024
- Two HoRSEs (invited panelist), July 2024
- NASA Goddard ASD Colloquium, October 2023
- San Francisco State University Physics Colloquium, April 2023
- University of Hawaii IfA Colloquium, April 2023
- EPRV5, March 2023 **[watch online]**
- University of Pennsylvania Astro Seminar, April 2021
- University College London Seminar, February 2020
- Princeton IAS Seminar, September 2019
- Sagan Summer Workshop, July 2019 **[watch online]**
- American Museum of Natural History Colloquium, May 2019
- Gordon Research Conference on Origins of Solar Systems, May 2019
- Carnegie EPL Colloquium, March 2019 **[watch online]**
- Cool Stars 20 (contributed plenary talk), August 2018 **[slides online]**
- Princeton Computational Astrophysics Workshop Series, May 2018 **[materials online]**

Publications *view on ADS*

***Starred** entries are undergrad or graduate student-led papers on which M. Bedell acted as a senior author.*

First- and Second-Author Papers:

1. **Savel, A. B.***, **Bedell, M.**, Kempton, E. M.-R., et al. 2025, Peering into the black box: forward-modeling the uncertainty budget of high-resolution spectroscopy of exoplanet atmospheres, AJ **169**, 135.
2. Zhao, L. L., **Bedell, M.**, Hogg, D. W., et al. 2024, A Compact, Coherent Representation of Stellar Surface Variation in the Spectral Domain, ApJ **977**, 140.
3. **Lam, C.***, **Bedell, M.**, Zhao, L., et al. 2024, gaspery: Optimized Scheduling of Radial Velocity Follow-Up Observations for Active Host Stars, AJ **168**, 200.
4. **Angelo, I.***, **Bedell, M.**, Petigura, E., et al. 2024, A Data-driven Spectral Model of Main Sequence Stars in Gaia DR3, ApJ **974**, 43.
5. **Savel, A. B.***, **Bedell, M.**, & Kempton, E. M.-R. 2024, cortecs: A Python package for compressing opacities, JOSS, **9**, 6104
6. **Gupta, A.F.*** & **Bedell, M.**, 2023, Fishing for Planets: A Comparative Analysis of EPRV Survey Performance in the Presence of Correlated Noise, AJ, **168**, 29.
7. **Tran, Q.H.***, **Bedell, M.**, Foreman-Mackey, D., et al. 2023, Joint Modeling of Radial Velocities and Photometry with a Gaussian Process Framework, ApJ, **950**, 162
8. Luger, R., **Bedell, M.**, Foreman-Mackey, D., Crossfield, I., *et al.*, 2021, Mapping Stellar Surfaces III: An Efficient, Scalable, and Open-Source Doppler Imaging Model, arXiv e-prints
9. Gan, T., **Bedell, M.**, Wang, S., Foreman-Mackey, D., *et al.*, 2021, HD 183579b: A Warm Sub-Neptune Transiting a Solar Twin Detected by TESS, MNRAS, **507**, 2220
10. Pope, B., **Bedell, M.**, Callingham, J., Vedantham, H., *et al.*, 2020, No Massive Companion to the Coherent Radio-Emitting M Dwarf GJ 1151, ApJ, **890**
11. **Bedell, M.**, Hogg, D., Foreman-Mackey, D., Montet, B., & Luger, R., 2019, WOBBLE: A Data-Driven Analysis Technique for Time-Series Stellar Spectra, AJ, **158**, 164
12. Luger, R., **Bedell, M.**, Vanderspek, R., & Burke, C., 2019, TESS Photometric Mapping of a Terrestrial Planet in the Habitable Zone: Detection of Clouds, Oceans, and Continents, arXiv e-prints
13. **Bedell, M.**, Bean, J., Meléndez, J., Spina, L., *et al.*, 2018, The Chemical Homogeneity of Sun-Like Stars in the Solar Neighborhood, ApJ, **865**, 68
14. **Bedell, M.**, Bean, J., Meléndez, J., Mills, S., *et al.*, 2017, Kepler-11 Is a Solar Twin: Revising the Masses and Radii of Benchmark Planets via Precise Stellar Characterization, ApJ, **839**, 94
15. Meléndez, J., **Bedell, M.**, Bean, J., Ramírez, I., *et al.*, 2017, The Solar Twin Planet Search. V. Close-In, Low-Mass Planet Candidates and Evidence of Planet Accretion in the Solar Twin HIP 68468, Astronomy and Astrophysics, **597**
16. **Bedell, M.**, Meléndez, J., Bean, J., Ramírez, I., *et al.*, 2015, The Solar Twin Planet Search. II. A Jupiter Twin Around a Solar Twin, Astronomy and Astrophysics, **581**
17. **Bedell, M.**, Meléndez, J., Bean, J., Ramírez, I., *et al.*, 2014, Stellar Chemical Abundances: In Pursuit of the Highest Achievable Precision, ApJ, **795**, 23
18. **Bedell, M.**, Villaume, A., Weiss, L., Sliski, D., *et al.*, 2011, Monitoring Hα Emission and Continuum of UXORs: RR Tauri, AJ, **142**, 164
